Career Summary

Application Support Engineer with 5+ years of experience in production environment support, incident management, and enterprise application troubleshooting. Strong expertise in SQL databases, Windows Server, Linux environments, and CRM systems (Dynamics 365, Zoho CRM). Experienced in P1/P2 incident handling, log analysis, performance monitoring, and stakeholder communication. Proven ability to maintain system stability and reduce production downtime.

Technical Skills

- *Operating Systems: Linux Ubuntu, Windows Server*
- *Databases: Microsoft SQL Server, PostgreSQL, Query Optimization, Data Validation*
- *CRM & Applications: Microsoft Dynamics 365 (CE, Finance, Sales modules), Zoho CRM, SAP Monitoring (Basic)*
- *Scripting & Automation: Shell Scripting (Bash, Cron Jobs), SQL Automation, ETL Pipelines, SFTP, Process Automation, n8n Workflow, API & Webhook, JSON Data Mapping*
- *Networking & Security: VLAN, VPN, Proxy Configuration, McAfee EPO, Patch Management*
- *Monitoring & Performance Optimization: Batch Job Monitoring, Log Analysis, Azure Monitor, Application Debugging, RCA, Performance Tuning*
- *Tools & Platforms: ServiceNow, ManageEngine, Freshservice, BigFix, WSUS, Putty, WinSCP, Github*

Professional Experience

Application Support Analyst
Client: Royal Enfield (Automotive Manufacturing Company) ***Globtier Infotech Payroll*** | **Nov 2023 – Jul 2025**
Environment: Windows Server 2022 | SQL Database | Azure Cloud Pipeline | Dynamics 365 | SAP

- *Supported production environment for the* Vector Database *project integrating Dynamics 365 and SAP systems.*
- *Monitored batch jobs, Azure Data Pipelines, and SQL databases ensuring seamless export/import between Dynamics 365 → Azure → MSSQL → SAP.*
- *Diagnosed and resolved data-flow and task failures, performing pipeline retriggers and validations in Azure.*
- *Ensured real-time synchronization between booking, sales, and purchase order systems; maintained 99% data accuracy.*
- *Collaborated with .NET developers to monitor IIS-hosted applications and resolve interface issues.*
- *Handled P1/P2 production incidents, assessing impact, performing root cause analysis, and ensuring timely resolution with minimal downtime.*
- *Analyzed application logs in Windows and SQL environments to identify performance bottlenecks and recurring errors.*
- *Communicated effectively with stakeholders and business teams regarding production impact, status updates, and recovery plans.*
- *Conducted Windows Server health checks, monitoring CPU, memory, and disk utilization to prevent performance degradation.*
- *Documented workflows, incident handling steps, and RCA reports to ensure repeatability and audit readiness.*

Application Support Engineer
Royal Enfield (Payroll: Adecco India) | March 2022 – Nov 2023

- *Provided L2 application support for Dynamics 365 (CE, FinOps, HR) and modules including Sales, Customer Service, Field Service, Marketing, Finance, and Supply Chain.*
- *Collaborated with engineers, product managers, and analysts to optimize system deployments.*
- *Monitored SAP production and QA batch jobs, ensuring system reliability and data consistency.*
- *Investigated and resolved customer-reported issues, delivering RCA and detailed solutions to stakeholders.*

Customer Support Engineer
Hitachi Systems India Pvt Ltd | March 2020 – March 2022

- *Delivered IT support for Microsoft Azure (VMs, AD Connect, storage accounts).*
- *Troubleshot desktops, operating systems, printers, and biometric devices.*
- *Managed remote troubleshooting, AD account management, and VPN connectivity for international teams.*
- *Monitored service tickets and ensured SLA compliance.*
- *Maintained network security with McAfee EPO, including periodic patching and policy updates.*
- *Performed monthly server patching via WSUS/BigFix and managed firmware upgrades.*
- *Maintained IT asset inventory and supported new office setups.*
- *Diagnosed and resolved network issues (VLAN, VPN, Wi-Fi, proxy settings).*

Education

RVS College of Engineering and Technology| Karaikal |
B.Tech, Electronics and Communication Engineering | Graduated: 2019

Technical Projects available in Github

Website to CRM Lead Automation Project

Linux | Apache2 | PHP | PostgreSQL | HTML | Tailwind CSS | n8n | Zoho CRM

- *Built automated workflow using HTML form → n8n → Zoho CRM.*
- *Configured webhook integration and JSON mapping.*
- *Automated real-time lead creation and tracking.*

SmartBiz – Small Business Billing & Inventory System

Linux | Apache2 | PHP | PostgreSQL | HTML | Tailwind CSS | AWS

- *Developed a full-stack billing and inventory management system for small businesses.*
- *Designed and managed PostgreSQL database schema with authentication and role-based access.*
- *Configured Apache web server on Linux environment for local deployment and testing.*
- *Implemented customer demo modules for multiple business types (Juice Shop, Restaurant, Salon, Bakery).*

Internships

Network Management Engineer | BSNL | Nov 2018 – Dec 2018

- Monitored network performance and ensured system availability.
- Configured and installed routers, switches, firewalls, load balancers, and VPNs.

Software Developer | NIIT Limited | Sep 2016 – Mar 2017

- Completed PHP Web Development Training, gaining experience in backend development and database management.
